

CITYBAG™

Product

Watering bag, which can contain up to 75 liters of water

Application

Ideal as an irrigation system for newly planted trees. Expected emptying time 5-9 hours.

Description

Irrigation bags have become more popular and widespread as irrigation systems for newly planted trees. The advantage is that it fills quickly, which reduces the working time consumption on irrigation, and that it provides a slow and even watering. Studies show that trees water with irrigation bags have a better growth than trees water with conventional surface irrigation.

Installed according to Milford's instructions.
